AMRINDER RATTANPAL

Staff DevOps Engineer

OBJECTIVE

Experienced DevOps professional with expertise in cloud migration, infrastructure automation, and containerization technologies. Proven ability to design and implement scalable enterprise solutions, streamline CI/CD processes, and mentor teams to deliver effective DevOps strategies. Eager to leverage skills and experience to drive innovation and efficiency in the role of Staff DevOps Engineer.

EMPLOYMENT HISTORY

Staff DevOps Engineer **June 2022 - Present**

Canadian Tire *(www.canadiantire.ca)*

- Led cloud migration of enterprise tools/applications to Azure, enabling cloud-native functionality and operational efficiency. Successfully migrated on-premises **HashiCorp Vault, Terraform Enterprise and JFrog Artifactory**.
- Developed and implemented standardized **CI/CD pipeline templates in Azure DevOps (ADO),** improving release velocity and consistency. Create **GitOps** based CICD templates for **FLUX and ArgoCD** deployments.
- Architected and engineered a scalable enterprise **container platform as a service (CaaS) on Azure AKS**, empowering customers with self-service deployment and management capabilities.
- Provided architectural leadership and mentorship, contributing to technical design decisions and guiding junior engineers to deliver effective DevOps solutions.
- Re-certify **Terraform modules** for Azure services to incorporate new features.
- Monitor platform applications using **NewRelic**, **Azure monitor and Application insights**.

Senior Consultant **April 2019 – June 2022**

BDO *(www.bdo.ca)*

- Hands on experience in design and implementing Azure IaaS and PaaS solutions.
- Implement IaC using **PowerShell and ARM templates**. Prepare and test initial scripts for IaC deployment and hand it over to junior team members to replicate resources in UAT and PROD environments.
- Authored comprehensive documentation and runbooks, covering infrastructure, automation scripts, monitoring, and governance for multiple clients.
- Configure DevOps server- setup service endpoints. Automate deployment using CI/CD pipelines in **Azure DevOps server**. Setup release pipelines to deploy code and infrastructure.
- Infrastructure monitoring- **Azure Security Center, Azure Monitor and Azure Sentinel, Grafana and Prometheus**
- Collaborated in SDLC processes, working cross-functionally with developers and business analysts to meet project delivery timelines.

Systems Administrator **Oct 2017 – March 2019**

RICOH (*www.ricohediscovery.com)*

- Manage **VMWare Clusters** – 3 clusters with 50+ host servers and 1000+ VMs
- **Use Symantec Endpoint Protection Server** to install antivirus on users. Update server with latest AV definitions.
- Plan **vulnerability scans** and report to IT director about remediations using MBSA
- Implement new **group policies** to secure network infrastructure.
- Configure Office 365 accounts with **2 Factor Authentication** on server for multilayer email security
- Plan and deploy Windows **patch management** using WSUS to secure servers from vulnerabilities
- Administered Citrix XenApp/XenDesktop across multiple hosting sites for secure client application delivery.

IT Specialist **Jan 2015 – Sep 2017**

Micro Computers Consulting (*www.mccinc.ca)*

- Remote monitoring using **SolarWinds** N-central to centrally manage client servers and other peripherals
- Experience configuring **Exchange servers** and set up client apps using protocols like POP, IMAP, MAPI.
- Configure and troubleshoot **firewalls-Cisco ASA 5510-5520, SonicWALL, Checkpoint** for perimeter protection
- SAN management, mainly **IBM and Lenovo and NetApp** to provision new storage for VMs.
- Virtualization – Install Esxi and Hyper-V hosts and configure VMs on them.
- Setup **Site-To-Site and Client-To-Site VPN** for encrypted communication between different client offices.
- Manage external DNS server for clients to update Host, CNAME and MX records to enable exchange and web server access.

EDUCATION

Masters - Electrical and Computers (Wireless and Networking) **2014**
Concordia University, Montreal, Canada
Bachelor of Technology – Electronics and Communication **2011**
Punjab Technical University, Jalandhar

ADDITIONAL INFORMATION

Certifications

Azure Administrator, SAFe
Earlier Certs: Azure Solutions Architect Expert, CKA, CEH, CCNA

Projects

- Led design and implementation of Container As a Service (CaaS) platform using AKS, Flux for GitOps, ADO for CICD, Istio for Service Mesh and Calico Policies.
- Created cookiecutter chatbot that generate project templates using AI. I used Langchain as AI framework and Azure Open AI for LLM. The agent was built using python.
- Developed a custom Kubernetes controller (in Go, using operator-sdk) to automate RBAC management for service accounts within FLUX deployments.
- Led migration of tools like HashiCorp Vault, Terraform Enterprise and JFrog Artifactory to Azure Cloud.
- Automated infrastructure provisioning for secure search systems using Azure PaaS (Azure SQL, WebApps, API Management, Service Bus); orchestrated 250+ client portal deployments using CI/CD.
- Prepare Architecture diagrams and documentation to present in ARB (Architecture Review Board).

VOLUNTEER CONTRIBUTIONS

- Invigilator, Concordia University
- Volunteered for discipline committee in school
